Profile

Software Engineering undergraduate with internship experience building and deploying full-stack applications using MERN, Next.js, and Django. Skilled in developing responsive UI with Tailwind CSS, implementing RESTful APIs, and working with PostgreSQL, MongoDB, and Supabase. Experienced in deploying and maintaining applications across AWS, Hostinger, and Coolify, and collaborating effectively in agile and remote team environments.

Education

Sri Lanka Institute of Information Technology (SLIIT) *Oct 2022 – Present*
B.Sc. (Hons) in Information Technology Malabe, Sri Lanka

Professional Experience

Software Engineer Intern (Remote) *Jun 2025 – Dec 2025*
Remotechies Sri Lanka

- Developed full-stack features using Next.js and Django, building REST APIs and integrating frontend components with backend services
- Implemented mobile workflows using Flutter and integrated PostgreSQL and Supabase for data storage and authentication
- Deployed and managed applications using Coolify, supporting container-based environments and production configuration
- Contributed through code reviews, Git-based collaboration, sprint planning, and daily standups in a remote team

Software Engineer Intern *Mar 2025 – Sep 2025*
DGatewayIn Malabe, Sri Lanka

- Built and maintained MERN stack modules with responsive UI using Tailwind CSS and reusable React components
- Integrated backend APIs and improved data flow, validation, and error handling across the application
- Deployed builds on AWS and Hostinger, managing environment variables, production updates, and release readiness
- Debugged and optimized existing codebases to improve performance, stability, and maintainability

Technical Projects

Appointment Booking System *2025*
Next.js, TypeScript, PostgreSQL, Prisma

- Developed a full-stack booking platform with authentication, validation, and role-based access workflows
- Implemented database migrations and structured APIs, focusing on maintainable architecture and scalability

SkillZone *2025*
Spring Boot, React

- Built a full-stack platform with authentication and social features (posts, likes, comments, follows)
- Integrated backend services with the React UI and implemented file upload handling

EduInsight *2025*
Laravel, MySQL

- Developed a management system with modular backend components, role-based access, and database-driven workflows

Resume Matcher AI

2025

Python, SBERT, TF-IDF, Streamlit

- Built an AI-based resume scoring tool combining semantic similarity and keyword matching with explainable weighting

Gym Management System

2024

React, Node.js, MongoDB

- Implemented employee records, leave requests, and reporting features with a MERN-based workflow

Event Photography Management System

2023

PHP, JavaScript, MySQL

- Built a web app supporting booking, payment processing, and reservation validation

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java, PHP, C/C++
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML, CSS, Bootstrap, Flutter
- **Backend:** Node.js (Express), Django, Django REST Framework, Spring Boot, Laravel
- **Databases:** PostgreSQL, MongoDB, MySQL, Supabase
- **Cloud & Deployment:** AWS, Hostinger, Coolify
- **Tools & Practices:** Git, GitHub, REST APIs, JWT Authentication, Agile Development, Postman

Certifications

- Postman API Fundamentals Student Expert
- GenAI 101 with Pieces
- Python Programming – University of Moratuwa
- Front-End Web Development – University of Moratuwa
- Server-Side Web Programming – University of Moratuwa

Languages

- **Tamil:** Native
- **English:** Intermediate
- **Sinhala:** Intermediate
