Profile

Software Engineer with 1+ year of professional experience developing and deploying full-stack web and mobile applications. Currently working as an Associate Software Engineer at DGateway In, with hands-on experience in React, Next.js, Node.js, Django, Flutter, and Spring Boot. Experienced in developing RESTful APIs, authentication systems, database-driven applications, testing, Git-based collaboration, and cloud deployment. Passionate about building reliable, scalable software solutions and continuously learning and applying emerging technologies.

Education

Sri Lanka Institute of Information Technology (SLIIT)

2022 – 2026

B.Sc. (Hons) in Information Technology

Malabe, Sri Lanka

Professional Experience

Associate Software Engineer

Sep 2025 – Present

DGateway In

Malabe, Sri Lanka

- Develop and maintain full-stack web applications using the MERN stack, including MongoDB, Express.js, React.js, and Node.js.
- Develop reusable React components and integrate frontend applications with backend services and RESTful APIs.
- Build RESTful APIs supporting CRUD operations, business logic, request validation, error handling, and data management.
- Implement secure authentication using password hashing and JWT-based authentication.
- Use Git and GitHub workflows including branching, merging, pull requests, and collaborative code reviews.
- Improve application quality through debugging, code refactoring, database query optimization, and maintaining data integrity.
- Support QA activities by testing features, reproducing defects, logging issues in Jira, and verifying completed fixes.
- Assist with server configuration, environment setup, CI/CD pipelines, deployment verification, and project handover.

Software Engineering Intern

Mar 2025 – Sep 2025

DGateway In

Malabe, Sri Lanka

- Contributed to full-stack application development from project setup through implementation, testing, deployment, and project handover.
- Built and maintained MERN stack modules with responsive interfaces using React.js, Tailwind CSS, and reusable components.
- Integrated backend services and APIs while improving validation, error handling, and application data flow.
- Participated in software testing, debugging, defect reproduction, and verification of completed fixes.

Software Engineer Intern

Jun 2025 – Dec 2025

Remotechies Pvt Ltd

Batticaloa, Sri Lanka

- Developed full-stack features using Next.js and Django, building REST APIs and integrating frontend components with backend services.
- Implemented mobile workflows using Flutter and integrated PostgreSQL and Supabase for data storage and authentication.
- Deployed and managed applications using Coolify, supporting container-based environments and production configuration.

- Participated in code reviews, Git-based collaboration, team meetings, testing, debugging, and technical documentation.

Technical Projects

EaseInn – Property Management System

2025

React, Flutter, Node.js, Express.js, TypeScript, MongoDB

- Developed a property management system supporting reservations, room management, staff management, analytics, payments, and task management.
- Designed REST APIs with JWT authentication and role-based authorization.
- Built responsive Flutter and React interfaces integrated with a scalable backend architecture.
- Implemented payment integration, audit logging, KPI analytics dashboards, and production-ready deployment architecture.

Appointment Booking System

2025

Next.js, TypeScript, PostgreSQL, Prisma

- Developed a full-stack booking platform with authentication, validation, and role-based access workflows.
- Implemented database migrations and structured APIs with a focus on maintainable architecture and scalability.

Resume Matcher AI

2025

Python, SBERT, TF-IDF, Streamlit

- Built an AI-based resume scoring tool combining semantic similarity and keyword matching with explainable weighting.

SkillZone

2025

Spring Boot, React

- Built a full-stack platform with authentication and social features including posts, likes, comments, and follows.
- Integrated backend services with the React interface and implemented file upload handling.

ProteqHer – SOS Listener

In Progress

Flutter, TensorFlow Lite, Machine Learning

- Building an AI-enabled women's safety application with real-time distress sound detection.
- Implementing on-device TensorFlow Lite inference with automatic SOS alerts and GPS location sharing.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java, PHP, C/C++
- **Frontend:** React.js, Next.js, Vue.js, Tailwind CSS, HTML, CSS, Bootstrap
- **Mobile:** Flutter, Android, Kotlin, TensorFlow Lite
- **Backend:** Node.js, Express.js, Django, Django REST Framework, Spring Boot, Laravel
- **Databases:** PostgreSQL, MongoDB, MySQL, Supabase
- **Cloud & Deployment:** AWS, Docker, Hostinger, Coolify, CI/CD
- **Tools & Practices:** Git, GitHub, Postman, Prisma, REST APIs, JWT Authentication, Jira, OpenAI API, Agile Development

Certifications

- Postman API Fundamentals Student Expert
- GenAI 101 with Pieces
- Python Programming – University of Moratuwa
- Front-End Web Development – University of Moratuwa
- Server-Side Web Programming – University of Moratuwa

Languages

Tamil: Native | **English:** Professional Working Proficiency | **Sinhala:** Intermediate
